IT IS RECOMMENDED THAT YOUR BOARD AFTER THE PUBLIC HEARING:

1. Find that the proposed County ordinance is being adopted for the purpose of meeting operational expenses of the Department and is therefore, exempt from the California Environmental Quality Act pursuant to Section 21080(b)(8) of the Public Resources Code, and Section 15273 of Title 14 of the California Code of Regulations (the State CEQA Guidelines); and
2. Adopt the ordinance and ordain that the new and adjusted fees will take effect 60 days following the adoption of the ordinance.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of this ordinance is to implement new and adjusted fees to recover the costs incurred by the Department for reviewing, evaluating and processing fuel modification plans, subdivision plans and environmental impact plans for land development projects located within the incorporated and unincorporated areas of Los Angeles County served by the District. Consolidating all of the various land development review fees into one section in the Fire Code will provide for easier administration of the fees and simplify the process for future amendments to those fees.

The Department currently conducts the following types of land development reviews for projects located within the City of La Habra and the unincorporated and incorporated areas of Los Angeles County served by the District:

- ◆ Subdivision Reviews
- ◆ Fuel Modification Reviews
- ◆ Environmental Impact Reviews

During Fiscal Year 2005-2006, the Department collected over \$285,000.00 for land development reviews for projects located within the unincorporated areas of Los Angeles County.

In contrast, the Department has not collected land development review fees from applicants who submit plans for projects located within the 58 incorporated cities served by the District. Based on previous fiscal year statistics, it is estimated that the Department could collect an additional \$473,896.00 in cost recovery fees for conducting land development reviews on projects located within the incorporated cities served by the Department.

The ordinance will enable the Department to collect land development review fees for projects located within the incorporated areas served by the District. These new fees

will be used to fund the additional staffing needed to implement the Department's Land Development Review Service Enhancement Program that many District cities have been requesting. All of the fees are necessary to provide the Department with adequate operating expenses. The ordinance also increases the fees for the Department's review of landscape, irrigation and fuel modification plans to cover operating expenses due to increases from inflation and cost of living factors.

If approved, the County ordinance will amend the Los Angeles County Fire Code (Title 32) and will become effective in the incorporated cities served by the District. If the ordinance is approved, the Department's Financial Management Division would manage the collecting of all land development review fees submitted by applicants.

Pursuant to Section 66014 of the Government Code, the above fees cannot exceed the estimated cost of providing the service for which the fee is charged. The Auditor-Controller has reviewed these fee revisions and has found that the proposed fees are the approximate cost recovery for the services involved.

FISCAL IMPACT/FINANCING

Developers submitting plans for land development reviews for projects located within incorporated areas served by the District will have to pay the same fees charged to developers with land development projects located within the unincorporated areas of Los Angeles County.

The County ordinance will not cause a financial impact on any of the incorporated cities served by the District.

The ordinance revises the fees with the intent to provide full recovery of all related costs. The ordinance also provides for annual Consumer Price Index adjustments to keep the fee current with cost increases.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

Pursuant to Section 66451.2 of the Government Code, the County is authorized to establish reasonable fees for the processing of tentative, final, and parcel maps and for related procedures. Environmental review fees relate to the processing of Environmental Impact Reports, tentative and final subdivision maps, and conditional use permits.

Pursuant to Section 66017 of the Government Code, any action adopting a fee or charge, or increasing a fee or charge adopted, upon a development project, as defined in Section 66000, which applies to the filing, accepting, reviewing, approving, or issuing of an application, permit, or entitlement to use, shall be enacted in accordance with the

notice and public hearing procedure specified in Section 66016. This shall be effective no sooner than 60 days following the final action of the adoption of the fee or charge or increase in the fee or charge.

To comply with the requirements of Sections 66016, 66018, and 6062a of the Government Code, the fee increases may only be ordered after a public meeting at which oral or written presentations can be made. These code sections also require that notice of the meeting, including a general explanation of the matter to be considered, and a statement that data indicating the amount of the cost, or estimated cost, required to provide the service for which the fee is levied and the revenue sources anticipated to provide the service, including General Fund revenues, is available, be mailed to all interested parties who file a written request for such at least 15 days prior to the meeting. As of the filing date of this item, no valid written request was on file neither with the Department nor in the Executive Office of the Board of Supervisors.

Section 66016 also requires that at least 10 days prior to the public hearing meeting, the local agency shall make available to the public data indicating the amount of cost, or estimated cost, required to provide the service for which the fee is levied and the revenue sources anticipated to provide the service, including General Fund revenues. Said data was made available at the Executive Office of the Board of Supervisors.

The ordinance has been approved as to form by County Counsel and is enclosed with an analysis.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

The provisions of this ordinance will have a significant positive impact on current County services. This ordinance will allow the Department to provide a higher level of customer service regarding plan check processing/tracking of development projects and environmental review referred from other County departments.

CONCLUSION

Adoption of this ordinance which amends Titles 12, 20, 21, 22, 26, and 32 of the Los Angeles County Code is exempt under the provisions of CEQA pursuant to Section 21080(b)(8) of the Public Resources Code and State CEQA Guidelines Section 15061(b)(3).

ANALYSIS

This ordinance amends Title 12 - Environmental Protection; Title 20 - Utilities; Title 21 - Subdivisions; Title 22 - Planning and Zoning; Title 26 - Building Code; and Title 32 - Fire Code of the Los Angeles County Code by adding new fees and consolidating and adjusting existing fees collected by the Fire Department for various land development and environmental reviews into Sections 317 and 320 of Title 32 - Fire Code. Placement of these fees in Title 32 will allow for their collection in both the unincorporated and incorporated territory within the Consolidated Fire Protection District. The new and adjusted fees are required to defray the costs incurred by the Fire Department in reviewing land development proposals, landscape, irrigation and fuel modification plans, and various environmental documents. The adjustments to the existing fees reflect increases due to inflation and cost of living factors.
